				FOOTNOTE EDITOR	
				Enter	Insert line break
				blank line	Start new paragraph
				Ctrl+S	Save footnote
				Ctrl+X/C/V	Cut / copy / paste
				Esc	Cancel

CURRENT NOTES

- Clipboard: uses the desktop system clipboard when a backend is available; otherwise Carriage falls back to its internal clipboard.
 - Tables: new tables support 2-6 columns and 1-60 data rows; imported tables with up to six columns remain editable regardless of row count.
 - Terminal: modal dialogs are supported at 80 x 24 or larger. There is no maximum terminal width or height.
- Footnotes: prose-only definitions may contain multiple paragraphs. Enter inserts a line break; a blank line starts the next paragraph.
 - Dialogs: table, footnote, Help, Markdown Reference, About, and Go to Section use resize-aware viewports.
 - Mouse: double-click selects a word; triple-click selects the current paragraph or list item. Wheel-scroll positioning and drag selection preserve the viewport.
