FOOTNOTE EDITOR		
Enter Insert line break blank line Start new paragraph Ctrl+S Save footnote Ctrl+X/C/V Cut / copy / paste Esc Cancel		

CURRENT NOTES

- Clipboard: uses the desktop system clipboard when a backend is available; otherwise Carriage falls back to its internal clipboard.
 - Tables: new tables support 2-6 columns and 1-60 data rows; imported tables with up to six columns remain editable regardless of row count.
 - Terminal: modal dialogs are supported at 80 x 24 or larger. True color is optional; color depth follows terminal capability.
- Footnotes: prose-only definitions may contain multiple paragraphs. Enter inserts a line break; a blank line starts the next paragraph.
 - Markdown: ambiguous or extension-like blocks are preserved as opaque source instead of being reflowed speculatively.
 - Mouse: double-click selects a word; triple-click selects the current paragraph or list item. Wheel-scroll positioning and drag selection preserve the viewport.
